10 TOP CUSTOMER SERVICE TRENDS

1. **Customer service bar is being set higher** by great companies due to higher expectations
2. **Value and experience trumps price** – unless low cost provider
3. **Personalisation** – technology tracks customer preferences. Data gives us trends, but people create the personal treatment around the knowledge
4. **AI** – machines abilities' are improving...may or may not replace humans!!
5. **Chatbot's** improving for on line text conversation
6. **Focus on customer success** – meaning success with your product; reducing or eliminating frustration with use of products, software etc.

10 TOP CUSTOMER SERVICE TRENDS

7. **Pro-active Customer Service** - **First time Fix!** Software to alert companies of issues. Proactive customer service promotes customer loyalty
8. **Decreased phone usage!** Alternatives are more in favour – Chatbot's, social media, self service; BUT phone needed for tougher problems and humans needed to solve in a fast manner
9. **Faster response times!** **Customers want you to be faster** in resolution. Numerous surveys reveal abysmal results for response times, complaints and questions especially on support channels. Average 7 hours response time in 2016 (Eptica) now speeding up!
10. **Convenience wins the day!** Amazon is king of this, Customer Service may be your thing but convenience will tip the scale in your favour
